installation view: Pratt Manhattan Gallery April 2006

Media Miniature charts a specific line through the last decade of media art experiments (1995-present). Small, short, light, cheap, and slow. These are the terms by which a recent group of artists working in digital moving image and sound, some for portable devices, have accomplished an astonishing range of new work. In testing the conceptual framework of narrative, film, text, sound, and visual art, this exhibition gathers together seven artists who push a limited scale of choices to create intentionally miniature work with monumental implications.
